TARGET PROBLEMS AT THE SOURCE.

360 UNDERCOVER™ helps you protect crops from late-season disease and insect infestations. It uses multidirectional spray nozzles and slides easily under the canopy so you can target fungicides, insecticides and nutrients exactly where they're needed. Increasing product efficacy and improving crop health.

KEY FEATURES + Flexible application + Under canopy application + Targeted application

SMART DESIGN FOR SMART APPLICATION.

360 UNDERCOVER mounts easily to your 360 Y-DROP™ riser and glides smoothly through the field for targeted application. Additionally, 360 UNDERCOVER gives you multiple nozzle choices, which allow you to adjust your application speed and pressure accordingly.

- + Each unit operates up to four multidirectional spray nozzles
- + Multiple nozzle types can be used for a customized spray pattern and droplet size
- + Ability to gain 150-degree horizontal spray application side by side
- + Special shell design protects nozzles and moves smoothly under the crop canopy
