IT'S V10... DO YOU KNOW WHERE YOUR NITROGEN IS?

Margins are tight. To maximize profit, you need to better monitor and manage nutrients and plant health all season. 360 Yield Center gives you the tools that make that possible.

⊕ 360 SOILSCAN™ gives you in-field nitrate analysis and application plans in minutes. Test your soil any time and make the right decisions.

⊕ 360 Y-DROP™ extends your application window — so you can apply N from V6 all the way up to VT — so you can capture more yield potential.

⊕ 360 UNDERCOVER™ provides targeted, under-canopy application that puts the fungicides, insecticides or nutrients right where they'll do the most good.

WHAT IF YOU COULD MAKE YOUR NITROGEN GO FURTHER?

Corn uses almost 75% of its needed nitrogen after V10[1]. A one-and-done approach to N management might leave your N tank empty with time left in the season.

Give your crop what it needs all season. Call or visit your local dealer for the 360 Yield Center tools that help you gain control for better-performing crops and better on-farm profits.
