

The streamlined shape and wide wings of the 360 BULLET ripper points generate a mini-earthquake that fractures from point to point. That loosens the full soil profile for improved root penetration. Ultra-hardened material is welded to all wear surfaces for long life.

NEW RIPPER POINT IMPROVES ACCESS TO SOIL NUTRIENTS.

360 BULLET™ FRACTURES MORE SOIL WITH SIMILAR HORSEPOWER AND FUEL.

Today's rippers do a good job of leaving the surface smooth and level. But below the surface there's a problem. Remove the loose soil on top and you'll see mounds of undisturbed soil that can create a bumpy ride for the planter and, what's worse, limit root penetration and access to nutrients.

KEY FEATURES

- + Wings that lift and fracture complete soil profile
- + Aerodynamic design sends shockwaves across full width of ripper
- + Soil-on-soil turbulence eliminates undisturbed berms of soil between points of traditional rippers and OEM points
- + Unrestricted root access to nitrogen, phosphorus, potassium, sulfur and other nutrients

PRECISION AND EFFICIENCY.

360 BULLET points do this with hardly any more time, horsepower or fuel. In a series of half-acre trials in a variety of soil types, with the same tractor and ripper, the 360 BULLET took only 1.5% longer to finish and maintained a pulling speed equal to traditional ripper points.

⊕ Below the surface, traditional ripper points leave 8" to 10" berms of tight, collapsed soil. When roots hit these, they funnel to bottom of the trench, which is closed by the smear left by the ripper point.

⊕ Compare the washboard pattern created by traditional ripper points on the right with the loose soil of the full fracture from the 360 BULLET on the left, where the middles are loose and serve as a smooth transition for roots to move on down to the subsoil's moisture reserves.

360 BULLET RIPPER POINTS ARE AVAILABLE FOR:

- + Case IH 870, 875, 530 and 730 ripper models
- + John Deere 512, 2700, 2730 ripper models
- + **Coming Soon**
Landoll, Krause Dominator, Salford 9700CTS and 9800DRH and most ripper models

GET MORE OF
THE POTENTIAL
YOU PLANT.

360 BULLET is part of a new approach to farming from 360 Yield Center. Designed to provide crop management solutions at every turn – from planning and planting to full-year nutrient application and harvesting. Giving you more control to significantly improve your yield.
