INSTRUCTIONS

360 Y-DROP

HAGIE DTS 2016 +

⊕ INTRODUCTION

- + Before beginning, it's important to know where each mounting bracket fits relative to the row spacing involved. The 360 Y-DROP unit should be precisely centered on the machine, as this is critical to the assembly of the system to the sprayer and for mounting the system to your sprayer boom. There are, however, many boom variations among all sprayer models. Your sprayer may not be identical to the model in the following steps of the guide, and the pictures may not exactly reflect your model. While these steps will help you install most of your 360 Y-DROP system, you may need to custom-fit some components with your particular boom.

⊕ RECOMMENDED TOOLS

- + Ratchet wrench with 1/2" and 9/16" deep well sockets
- + 3/8" 12-point socket
- + 1/2" and 9/16" combination wrenches
- + #2 Phillips screwdriver (for the shield installation)
- + Drill with 7/16" drill bit

⊕ TORQUE VALUES

- + Refer to these torque values when tightening all fasteners

+ 5/16" stainless	U-bolt	15 ft/lbs
+ 5/16" stainless	Set screw	15 ft/lbs
+ 3/8" carbon	U-bolt	35 ft/lbs
+ 5/16" carbon	U-bolt	30 ft/lbs
+ 5/16" carbon	Stop bolt	30 ft/lbs

⊕ QUESTIONS

- + Call our Product Support team at 888-512-4890

I.

ESTABLISH
DROP LOCATIONS

Figures 1 and 2

Step 1 Locate the center of the machine and identify the location of all the drops. On the sprayer boom, mark where each riser mount will be located. This will ensure that the extension tubes will not interfere with the riser mounts.

Figure 3

Step 2 Starting at the wing fold pivot pin on the primary boom, measure and mark points at 40", 100", 160", 220" and 280" (all measurements are $\pm 5"$). Repeat for the other primary boom.

Figure 1

Figure 2

Figure 3

II.

INSTALL PRIMARY BOOM SPRAYER
MOUNT PACKAGE

Figures 4

To prepare for the steps that follow, you will need to drill two 7/16" holes at mounting location 1 (40" +/-5" from the pivot pin) on both OEM Primary booms. This will allow for the installation of the first mounting position of the square U-bolt on the front and rear OEM booms.

Figures 5 and 6

Step 1 With the thread pointing down, install square U-bolts (1) on the top of the OEM primary boom.

Bag AF (2.0")

Bag AG (2.5")

Step 2 Install bracket assemblies (2) and the flange nuts.

Hardware Kit D

Figure 7

Step 3 Install extension tube (3).

Step 4 Install boom bracket (4) onto extension tube (3).

Repeat Steps 1-4 for the remaining mounting positions on the primary booms.

Figure 4

Figure 5

Figure 6

Figure 7

III. INSTALL CENTER SECTION SQUARE TUBE

Figures 9 and 10

Step 1 Install u-bolt (1) and 14" top plate (2) using the supplied hardware.

Step 2 Install bracket assemblies (3).

NOTE: Install OEM mount bracket kits so that the set screws are pointing inward to ensure clearance when the primary booms are folded (see Figure 11).

Step 3 Install extension tube (4).

Step 4 Install 360 Y-DROP boom bracket (5) on extension tube (4).

Bag BB

Step 5 Install stop bolt assemblies (6).

Hardware Kit B within Bag BB

Step 6 Install set screws (7) on bracket assemblies.

Hardware Kit D within the Center Section Kit

Step 7 Install the set screw on Y-DROP boom bracket.

Hardware Kit D within the Center Section Kit

Repeat steps 1-7 for the remainder of the center section support assemblies.

Figure 11

IV.

INSTALL 360 Y-DROP
BOOM

Figure 12

Step 1 Assemble 5' boom sections (1) utilizing 8" boom connectors (2) and the supplied hardware.

Hardware Bag CC

Step 2 Repeat Step 1 as needed in order to assemble the entire 360 Y-DROP boom.

Step 3 Set the 360 Y-DROP boom assembly onto boom bracket (3).

Repeat Steps 1 -3 for the remaining boom assemblies.

CAUTION: The 360 Y-DROP boom assembly may weigh up to 150 lbs. (68 kg). Exercise caution and enlist help for this process.

Figure 13

Step 4 In order to span the full length of the center section 360 Y-DROP boom, you will need to cut and drill one of the 5' boom sections to 1'. Mount this 1' section between two full 5' boom sections. Drill a 7/16" through hole centered 2" from the outside edge.

Figures 14 and 15

Step 5 Install square U-bolt (1), the 5/16" extra thick washers, and the 5/16" nuts over the 360 Y-DROP boom (2).

Hardware Kit A

Step 6 Install stop bolt (3) at the both the front and the rear of the extension tube. Repeat for remaining stop bolts.

Hardware Kit B

Step 7 Install stainless steel set screw and jam nut assembly (4). See Figure 12 for detail. Repeat for the remaining mount assemblies on the primary boom.

Figure 12

Figure 13

Figure 14

Figure 15

V.

INSTALL BREAKAWAY ASSEMBLY - ONE PIECE

Figure 16

Step 1 Install breakaway assembly - one piece (1) using the square U-bolts (2) and the extra thick washer and Nylock nut. Repeat for the remaining breakaway assemblies - one piece.

Hardware Kit C

Figure 17

Figure 17 may show more or fewer mounts than your installation. The alignment and quantity of the mounts will depend on your row spacing.

Figure 18

Step 2 Install riser tube assembly (1) into the breakaway assembly - one piece (2).

Step 3 Install pin (3).

Repeat Steps 2 and 3 for the remaining riser tube assemblies.

NOTE: Included in most sprayer mount packages are standard riser mounts to be used when primary booms are folded and in transport mode. These standard riser mounts should be mounted in locations that allow you to relocate the drops away from potential tire interference. See "Install Riser Mounts Without Breakaway Assemblies" section on next page for more instructions.

V.

**INSTALL RISER MOUNTS WITHOUT
BREAKAWAY ASSEMBLIES (OPTIONAL)**

Figure 19

Step 1 Install riser mount (1) using the square U-bolts (2) and the extra thick washer and nylock nut. Repeat for the remaining riser mounts.

Hardware Kit C

Figure 20

Figure 20 may show more or fewer riser mounts than your installation. The alignment and quantity of the riser mounts will depend on your row spacing.

Figure 21

Step 2 Install riser tube assembly (1) into the riser mount (2).

Step 3 Install pin (3).

Repeat Steps 2 and 3 for the remaining riser tube assemblies.

Figure 20

Figure 21

VI.

INSTALL SHIELDS AND
RISER HOSES

Figure 22

Step 1 Install shield (1) onto riser tube (2).

Figure 23

Step 2 Install base unit (1) onto riser tube (2).

Figure 24

Step 3 Assemble drag hoses (1) to 360 Y-DROP base and secure with hose clamps (2).

Figure 25

Step 4 Note the orientation of the drag hose clamps. The tails should point inward.

Figure 22

Figure 23

Figure 24

Figure 25

VI.

INSTALL SHIELDS AND
RISER HOSES *(CONTINUED)*

Figure 26

CAUTION: Do NOT use a drill or impact driver for Steps 5 and 6.

Step 5 Install two ½" screws (1).

Step 6 Install two ¾" screws (2).

Step 7 Install rubber washer (3) into the "Y".

Figure 27

Step 8 Install riser hose assembly (1) into the "Y".

Figure 28

Step 9 Route riser hose assembly (1) as shown in Figure 28.

Step 10 Install the riser hose assembly to the OEM nozzle body.

Step 11 Use 3 equally spaced plastic ties to secure the riser hose assembly.

Repeat Steps 1-11 for the remaining 360 Y-DROP Shields.
