

# INSTRUCTIONS 360 Y-DROP®

JOHN DEERE 4930/4940

#### 360 Y-DROP® REGISTRATION

### INSTRUCTIONS 360 Y-DROP

JOHN DEERE 4930/4940

#### (+) INTRODUCTION

+ Before beginning, it's important to know where each mounting bracket fits relative to the row spacing involved. The 360 Y-DROP unit should be precisely centered on the machine, as this is critical to the assembly of the system to the sprayer and for mounting the system to your sprayer boom. There are, however, many boom variations among all sprayer models. Your sprayer may not be identical to the model in the following steps of the guide, and the pictures may not exactly reflect your model. While these steps will help you install most of your 360 Y-DROP system, you may need to custom-fit some components with your particular boom.

#### (+) RECOMMENDED TOOLS

- + Ratchet wrench with 1/2" and 9/16" deep well sockets
- + 3/8" 12-point socket
- + 1/2" and 9/16" combination wrenches
- + #2 Phillips screwdriver (for the shield installation)

#### TORQUE VALUES

+ Refer to these torque values when tightening all fasteners

| + 5/16" stainless | U-bolt    | 15 ft/lbs |
|-------------------|-----------|-----------|
| + 5/16" stainless | Set screw | 15 ft/lbs |
| + 3/8" carbon     | U-bolt    | 35 ft/lbs |
| + 5/16" carbon    | U-bolt    | 30 ft/lbs |
| + 5/16" carbon    | Stop bolt | 30 ft/lbs |

#### (+) QUESTIONS

+ Call our Product Support team at 888-512-4890

# I. ESTABLISH DROP LOCATIONS

Figures 1 and 2

Step 1 Locate the center of the machine and identify the location of all the drops. On the sprayer boom, mark where each riser mount will be located. This will ensure that the extension tubes will not interfere with the riser mounts.

Figure 3

Step 2 Starting at the wing fold pivot pin on the primary boom, measure and mark points at 31", 88", 151"; 211" and 273" (all measurements are ±5"). Repeat for the other primary boom.

Figure 1

Figure 2

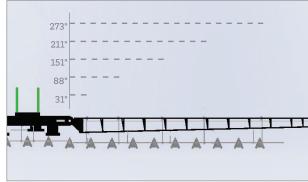

Figure 3

# (II.)

### INSTALL MOUNT ASSEMBLIES ON THE OEM PRIMARY BOOM

#### Figure 4

Step 1 With the threads pointing up, install U-bolt (1) on the bottom side of the OEM primary boom.

Bag EE

Step 2 Install bracket assembly (2) and flange lock nut (3).

Hardware Kit D

**Step 3** Install extension tube (4).

**Step 4** Install boom bracket (5) onto the extension tube.

Step 5 Install stop bolts (6) at both the front and the rear of the extension tube.

Hardware Kit B

Figure 5

Step 6 Install stainless steel set screw and jam nut assembly (1) onto the bracket assembly.

Hardware Kit D

Repeat Steps 1-6 the remaining mount assemblies on the OEM primary boom.

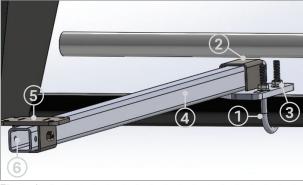

Figure 4

Figure 5

# III. INSTALL CENTER SECTION SQUARE TUBE

#### Figure 6

Step 1 Install u-bolt (1) and 14" top plate (2) using the supplied hardware.

**Step 2** Install bracket assemblies (3).

Figure 7

**Step 3** Install extension tube (1).

Step 4 Install 360 Y-DROP boom bracket (2) on extension tube (1).

Bag BB

**Step 5** Install stop bolt assemblies (3). Hardware Kit B within Bag BB

**Step 6** Install set screws (4) on bracket assemblies.

Hardware Kit D within the Center Section Kit

Figure 8

Step 7 Install set screw (1) on Y-DROP boom bracket.

Hardware Kit D within the Center Section Kit

Repeat steps 1-7 for the remainder of the center section square tube.

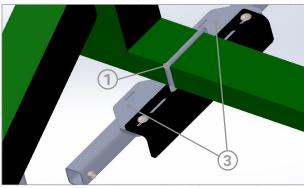

Figure 6

### IV. INSTALL 360 Y-DROP BOOM

#### Figure 9

Step 1 Assemble 5' boom sections (1) utilizing 8" boom connectors (2) and the supplied hardware.

Hardware Bag CC

**Step 2** Repeat Step 1 as needed in order to assemble the entire 360 Y-DROP boom.

**Step 3** Set the 360 Y-DROP boom assembly onto boom bracket (3).

Repeat Steps 1-3 for the remaining boom assemblies.

**CAUTION:** The 360 Y-DROP boom assembly may weigh up to 150 lbs. (68 kg). Exercise caution and enlist help for this process.

#### Figure 10

Step 4 In order to span the full length of the center section 360 Y-DROP boom, you will need to cut and drill one of the 5' boom sections to 1'. Mount this 1' section between two full 5' boom sections. Drill a 7/16" through hole centered 2" from the outside edge.

Figures 11 and 12

**Step 5** Install square U-bolt (1), the 5/16" extra thick washers, and the 5/16" nuts over the 360 Y-DROP boom (2).

Hardware Kit A

Step 6 Install stop bolt (3) at the both the front and the rear of the extension tube.

Repeat for remaining stop bolts.

Hardware Kit B

Step 7 Install stainless steel set screw and jam nut assembly (4). See Figure 16 for detail. Repeat for the remaining mount assemblies on the primary boom.

Figure 9

Figure 10

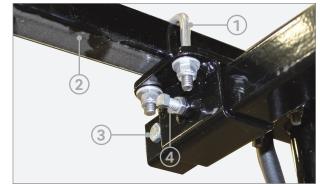

Figure 11

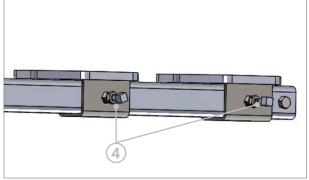

Figure 12

# INSTALL YOKE ASSEMBLIES ON THE OEM PRIMARY BOOM

Figures 13 and 14

- Step 1 With the U-bolt pointing to the rear, install the yoke mount (1) and flange nuts to upper boom section.
- Step 2 With the square U-bolt threads pointing up and using the extra thick washer and Nylock nut, install yoke mount (2) to the 360 Y-DROP boom section.
- Step 3 Using pins, install the yoke straps (3) between the upper boom and 360 Y-DROP boom. Using the flange nuts, tighten the 1-1/4" carriage bolts.

Repeat Steps 1-3 for the remaining yokes on the OEM primary booms. Yokes should be spaced approximately 60" ( $\pm 5$ ") apart.

**NOTE:** A 4" x 3/8" thick plate has been provided to be used as a spacer and should be installed between the OEM boom and the upper yoke mount if needed.

Figure 13

Figure 14

## INSTALL BREAKAWAY ASSEMBLY - ONE PIECE

Figure 15

Step 1 Install breakaway assembly - one piece (1) using the square U-bolts (2) and the extra thick washer and Nylock nut. Repeat for the remaining breakaway assemblies - one piece.

Hardware Kit C

Figure 16

Figure 16 may show more or fewer mounts than your installation. The alignment and quantity of the mounts will depend on your row spacing.

Figure 17

**Step 2** Install riser tube assembly (1) into the breakaway assembly - one piece (2).

Step 3 Install pin (3).

Repeat Steps 2 and 3 for the remaining riser tube assemblies.

NOTE: Included in most sprayer mount packages are standard riser mounts to be used when primary booms are folded and in transport mode. These standard riser mounts should be mounted in locations that allow you to relocate the drops away from potential tire interference. See "Install Riser Mounts Without Breakaway Assemblies" section on next page for more instructions.

Figure 15

Figure 16

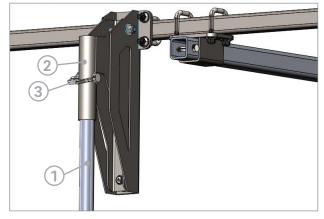

Figure 17

## INSTALL RISER MOUNTS WITHOUT BREAKAWAY ASSEMBLIES (OPTIONAL)

Figure 18

Step 1 Install riser mount (1) using the square U-bolts (2) and the extra thick washer and nylock nut. Repeat for the remaining riser mounts.

Hardware Kit C

Figure 19

Figure 19 may show more or fewer riser mounts than your installation. The alignment and quantity of the riser mounts will depend on your row spacing.

Figure 20

**Step 2** Install riser tube assembly (1) into the riser mount (2).

Step 3 Install pin (3).

Repeat Steps 2 and 3 for the remaining riser tube assemblies.

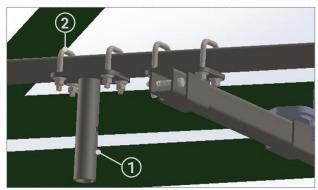

Figure 18

Figure 19

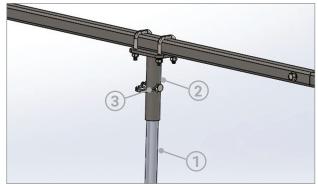

Figure 20

# VII. INSTALL SHIELDS AND RISER HOSES

Figure 21

**Step 1** Install shield (1) onto riser tube (2).

Figure 22

**Step 2** Install base unit (1) onto riser tube (2).

Figure 23

**Step 3** Assemble drag hoses (1) to 360 Y-DROP base and secure with hose clamps (2).

Figure 24

**Step 4** Note the orientation of the drag hose clamps. The tails should point inward.

Figure 21

Figure 22

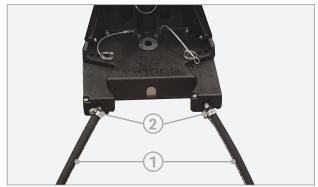

Figure 23

Figure 24

Figure 25

**CAUTION:** Do NOT use a drill or impact driver for Steps 5 and 6.

**Step 5** Install two ½" screws (1).

Step 6 Install two ¾" screws (2).

**Step 7** Install rubber washer (3) into the "Y".

Figure 26

**Step 8** Install riser hose assembly (1) into the "Y".

Figure 27

**Step 9** Route riser hose assembly (1) as shown in Figure 24.

**Step 10** Install the riser hose assembly to the OEM nozzle body.

**Step 11** Use 3 equally spaced plastic ties to secure the riser hose assembly.

Repeat Steps 1-11 for the remaining 360 Y-DROP Shields.
