### ★ THE CHOICE

WHY CHOOSE  
**360 BANDIT**

When we looked at 360 BANDIT we liked the ability to place the nitrogen close enough to the row to make it easily accessible to the plant at the earliest growth stage.

### ★ THE 360 BANDIT EXPERIENCE

Q BEFORE 360 BANDIT...

Before trying 360 BANDIT we tried everything from straight stream nozzles, fan tips, 4" to one side, etc.

Q AFTER 360 BANDIT...

We really feel 360 BANDIT has been a game changer in the cotton and corn fertilizer delivery industry.

Q HOW DID 360 BANDIT COMPARE TO YOUR PREVIOUS ON-PLANTER NITROGEN SYSTEMS?

We feel that 360 BANDIT did a much better job delivering the maximum amount of fertilizer right where it was needed.

Q DESCRIBE THE NITROGEN PLACEMENT WITH 360 BANDIT.

The placement is a consistent 2" either side of the row.

Q DID BANDIT ADD VALUE OR EFFICIENCY TO YOUR FARM?

Any time you can improve yields and save on cost, you become more efficient. We feel that by saving a trip across the field all the while delivering the fertilizer to the plant at the earliest possible time, we have streamlined our planting and emergence.
