

**THESE QUESTIONS EXCLUDE 360 TANKS FOR RT TRACTORS.**

**Q HOW MANY GALLONS DO THEY HOLD?**

Capacity is 700 gallons.

**Q HOW MUCH DOES THE SYSTEM WEIGH WHEN EMPTY?**

They are approximately 2,000 pounds.

**Q HOW LONG DOES IT TAKE TO INSTALL 360 TANKS?**

Expect about 4 hours for two people with a forklift.

**Q IS VISIBILITY REDUCED WITH 360 TANKS?**

The tanks are low profile and visibility is improved compared to other saddle and front-mounted tanks. The tanks are no wider than the tractor with duals so there is no increase in transport width.

**Q DO I HAVE TO HAVE DUALS?**

We support installations with duals on front and rear.

**Q WHAT CONNECTIONS AND HOSES ARE INCLUDED?**

**OUR 360 TANK KIT INCLUDES:**

- A 360 TANKS
- B Frame
- C Mounting Hardware
- D Front Shut Off Valves

**AN OPTIONAL HOSE KIT IS AVAILABLE THAT PROVIDES:**

- A Ports
- B Hoses
- C Connections Needed to Fill and Plumb to the Planter

**Q WHAT KIND OF PUMP AND CONTROLLER IS NEEDED?**

360 TANKS can be used with any standard PTO or hydraulic pump and any standard control system.

**Q CAN I USE MY FRONT WEIGHTS WHEN I USE 360 TANKS?**

The 360 TANKS frame uses the space where weights are mounted. And the mounting brackets and tanks do provide some added weight to the front of the tractor. We do make an optional weight mounting kit that can be ordered and allows for a limited number of additional weights.
